

## membership

The Health Collaborative (THC) recognizes that the needs of a large health system are different from those of a long-term care facility or a private practice.

That's why we make it easy for you to choose the membership level that is right for you.

Whether you want full participation in all THC events or you only wish to participate in our GPO, we have a membership level to fit your needs. We also offer a discount on our health information exchange, hb/suite, to all members above the GPO level.
